

QCPStatisticalBox::  
clearData

QCPStatisticalBox::  
setData

QCPStatisticalBox::  
setUpperQuartile

```
graph LR; A[QCPStatisticalBox::clearData] --> C[QCPStatisticalBox::setUpperQuartile]; B[QCPStatisticalBox::setData] --> C;
```

The diagram illustrates a flow or dependency where two separate actions, 'clearData' and 'setData', both lead to the 'setUpperQuartile' action. The boxes for 'clearData' and 'setData' are white with black borders, while the 'setUpperQuartile' box is gray with a black border. Blue arrows indicate the direction of the flow from left to right.
