

QCPLItemTracer::draw

QCPLItemTracer::setGraph

QCPLItemTracer::updatePosition

```
graph LR; A[QCPLItemTracer::draw] --> C[QCPLItemTracer::updatePosition]; B[QCPLItemTracer::setGraph] --> C;
```

The diagram illustrates a call relationship between three methods of the QCPLItemTracer class. On the left, two white rectangular boxes represent the calling methods: QCPLItemTracer::draw (top) and QCPLItemTracer::setGraph (bottom). On the right, a gray rectangular box represents the target method: QCPLItemTracer::updatePosition. Two blue arrows originate from the right side of the left boxes and point towards the left side of the gray box, indicating that both draw and setGraph methods invoke updatePosition.
