

QCItemAnchor::~~QCItemAnchor

QCItemPosition::~~QCItem
Position

QCItemPosition::parentAnchorY

```
graph LR; A[QCItemAnchor::~~QCItemAnchor] --> C[QCItemPosition::parentAnchorY]; B[QCItemPosition::~~QCItemPosition] --> C;
```

The diagram illustrates a memory management or cleanup process. On the left, there are two rectangular boxes representing destructors. The top box is labeled 'QCItemAnchor::~~QCItemAnchor' and the bottom box is labeled 'QCItemPosition::~~QCItemPosition'. On the right, there is a shaded rectangular box labeled 'QCItemPosition::parentAnchorY'. Two blue arrows originate from the right side of the two destructor boxes and point towards the left side of the shaded box, indicating that both destructors are responsible for cleaning up or releasing the memory associated with the 'parentAnchorY' variable.
