

QCPPlottableLegendItem
::draw

QCPPlottableLegendItem
::minimumSizeHint

QCPLegend::iconTextPadding

```
graph LR; A[QCPPlottableLegendItem::draw] --> C[QCPLegend::iconTextPadding]; B[QCPPlottableLegendItem::minimumSizeHint] --> C;
```

The diagram illustrates two calls to the `QCPLegend::iconTextPadding` property. On the left, two white rectangular boxes represent the methods `QCPPlottableLegendItem::draw` and `QCPPlottableLegendItem::minimumSizeHint`. Blue arrows point from each of these boxes to a single gray rectangular box on the right, which represents the `QCPLegend::iconTextPadding` property. This indicates that both methods access or modify this specific property.
